

**Protein A/G Agarose**  
*Protein Purification***Catalogue Number:**

IR005	1 mL
IR005-10ML	10 mL

**Description:** Protein A/G Agarose is a mixture of native protein A and G covalently coupled to agarose beads. Protein A/G is designed specifically for the binding of the Fc region of immunoglobulin of many mammalian species without interfering with the binding ability of an antibody to its antigen.

Protein A/G Agarose has been extensively used for the isolation of a broad variety of immunoglobulin molecules generated from several mammalian species, particularly if the information of antibody subclass is unknown.

**Monoclonal Antibody:** Human: IgG1, IgG2, IgG3, IgG4; Rat: IgG2a, IgG2b, IgG2c; Mouse: IgG1, IgG2a, IgG2b, IgG3

**Polyclonal Antibody:** Human, Rabbit, Mouse, Guinea pig, Cow, Horse, Goat

**Formulation and Specification:**

- 50% Protein A/G agarose resin suspended in PBS containing 20% ethanol
- Ligand density: 2 mg Protein A/G per 1 mL beads
- Binding capacity: Up to 20 mg human IgG per 1 mL beads

**Application:** Protein purification, immunoprecipitation

**Storage & Stability:** Stable for a minimum of 1 year at 4-8°C.

**Buffer Compatibility:** Several buffers provided by MACGENE are compatible with Protein A/G Agarose

**Wash/Binding Buffers:**

Cat# MP011	TBS	50 mM Tris HCl, 150 mM NaCl, pH 7.4
Cat# MP011B	Binding Buffer	50 mM Tris HCl, 150 mM NaCl, pH 7.4
Cat# MP011T	TBS-T	50 mM Tris HCl, 150 mM NaCl, pH 7.4, 1% Triton X-100
Cat# MP011TC	Washing Buffer (5X)	Dilute to 1X before use
Cat# MP015	RIPA	RIPA Buffer
Cat# MP015M	RIPA(M)	RIPA Buffer, Modified

**Elution Buffer:**

Cat# MP005M	Protein Elution Buffer, pH3.5
Cat# MP005S	Protein Elution Buffer, pH1.8
